

Instructions to create the boot image for zcu102 board:

1. Download the DrivelImage XML from <http://www.runtime.org/driveimage-xml.htm>. free version works fine.
2. Install and launch it on Windows.
3. Insert the compact flash card. Note down the drive name
4. On DrivelImage XML click 'Browse' and browse to the location where you cloned the repository and choose 'zcu102_image_skin' folder. Then click Open
5. Click 'Restore' -> choose the drive that has the compact flash than click 'Next' and follow the prompts
